## Objective

Software Engineering graduate with a strong passion for software development. Eager to leverage my skills and expand my knowledge through hands on trainings and experiences.

## Education

### BACHELOR OF SOFTWARE ENGINEERING

Nepal College of Information Technology (NCIT) | Pokhara University

## Skills

- **Languages:** C#, Java, JavaScript, Node (Express), Flutter (Dart), Html, Css, SQL.
- **Tools:** Git, Github, Postman.

## Projects

### Blog Website ([git repository](#))

- Developed a blog site using Asp.net core MVC and SQL.
- Implemented CRUD operations for managing blogs including add, read, update and delete functionalities and Comments.
- Used Identity Framework for user authentication and entity framework core for interacting with database.

### Travel App ([git Repository](#))

- Developed a mobile app using Flutter, Dart and Firebase enabling users to book travel packages, rate their experiences, and integrated payment gateway.
- Implemented Firebase to store and retrieve data and Firebase Authentication for user Authentication.
- Developed a separate admin dashboard for managing bookings and package management.

### Social Media APIs ([git Repository](#))

- Developed a social Media APIS using Node, Express and Mongo DB.
- Implemented authentication to secure endpoints and ensure data integrity.
- Created APIS endpoints for add, read, update and delete post as well as like and follow post.
- Tested APIs using Postman to ensure reliability and functionality.

## Training/Boot camps

- Flutter App Development Boot camp.
